

# THREEMA EDUCATION FOR SCHOOLS

Pioneer and Market Leader in Secure Communication Solutions

**Effective communication is challenging in schools and universities:** teachers, parents, and students need reliable information and an easy way to get in touch with each other quickly.

Threema Education is a **privacy-compliant, structured, and easy-to-use communication solution** that was developed specifically for use in schools. No phone numbers are required, no data is shared, and schools have full control. This ensures that the flow of information remains secure, targeted, and efficient.

## Threema Education simplifies school communication at all levels:

### Structured Group Communication

Groups for classes or projects can be easily set up so that teachers and students can work together in clearly defined spaces. Shared message rooms facilitate the exchange of ideas, tasks, and documents and ensure that school-related content does not get lost in private chats.

### Targeted Information Distribution

Threema Education pools all organizational information related to parents' evenings, school camps, sick notes, an canceled classes in one secure channel. Teachers can reach entire classes or parent associations with just a few clicks. This ensures that everyone stays up to date, receives the same information at the same time, and reduces the administrative workload by eliminating the need for calls to the school office.

### Children and Young People Need Protection

Children and young people are particularly vulnerable online. This is why communication between everyone involved in a school setting requires not only efficiency but also security. The centrally controlled, closed communication circle prevents uncontrolled contact from outside. The school thus assumes responsibility for protecting the digital integrity of its school community.

### Easy Introduction and Administration

Threema Education can be integrated into everyday school life with little effort. Through a clear administration interface, administrators can centrally manage the school community, groups, and permissions, assign licenses with just a few clicks, and flexibly adapt structures to changes in class or personnel.

### Practical Features for Everyday School Life

Integrated polls make it easy to coordinate appointments. Teachers can quickly gather feedback without having to use external tools, and they get a clear picture of who is available when and how certain topics are assessed. In addition, Threema Education allows for the secure transmission of photos, documents, and forms, as well as the establishment of clear guidelines for availability outside of class hours.

### Trust Begins With Security

Confidential topics are discussed every day in schools. Threema Education is committed to data protection: no mobile phone numbers, no centrally stored meta-data, no user profiles. Instead, it offers genuine end-to-end encrypted chats and secure voice and video calls. This gives schools full control, ensuring that confidential content stays confidential.

Threema Education is a version of the renowned Swiss messenger Threema Work that is available exclusively to educational institutions – **at an attractive special price.**

**USE OF  
PERSONAL SMART-  
PHONES WITHOUT  
SHARING PHONE  
NUMBERS**

**EDUCATION  
EUR 12.00**

per year, per teacher

- ✔ Billing per teacher per year
- ✔ All students are included free of charge
- ✔ Licenses that become available (e.g., due to staff changes) can be easily transferred to new teachers

#### Hardtschule Durmersheim

“Threema is easy to set up. It only took a few days until the app was rolled out across the school.”

Volker Arntz, Rektor

#### Arnold-Janssen-Gymnasium

“Since Threema Education licenses are transferable, there are no follow-up costs.”

Harald Lohmann, Administrator

#### Oberwiese School

“The adoption rate at the school was 100% in just five school days. I was very pleasantly surprised by such a high level of acceptance.”

Simon Koch, Deputy Headmaster
